

Swiss Parenterals Limited received European Union (EU) GMP approval.

7-8-2020

India's leading manufacturer of Sterile Injectables company to soon enter the EU markets with various range of injectables and expand gradually.

Swiss Parenterals Limited, one of the India's leading sterile injectable manufacturer has received the European Union (EU) GMP for its two state of the art manufacturing facilities located at Bavla in Gujarat. The certification will allow the company to market its product in all the 27 member countries of EU and also give access to European Economic Area (EEA) countries.

The company plans to enter in the EU and EEA with its super specialty niche molecules in sterile injectables segment.

The inspection was carried out in the end February 2020 and first week of March 2020 for both of its site situated in Bavla, Ahmedabad. The final approval received on 31st of July 2020.

The company is currently engaged in manufacturing sterile injectables in both liquid and powder forms and covers a special segment of niche injectables in various dosage like ampoules, vials, lyophilization, pre filled syringe, cartridges, sterile eye drops and expanding soon into liquid inhalation anesthesia, sterile ointment and suppositories. Above this the company is also engaged in contract manufacturing of oral solid dosage including tablets, capsules and other forms from its various vendors.
